Research Lab. Aim Of Cancer Drive

The Carbon chapter of the I.O.D.F. has undertaken to canvass the district for funds for the Canadian Cancer Society and any donation given to the canvasser who calls on you will be gratefully accepted. Donations of \$1.00 or more automatically make you a member of the Society. If the canvasser happens to miss YOU your donation may be left with Mrs. Switzer at The Carbon Trading Company store.

The Canadian Cancer Society Campaign now under way in this district is asking the support of every citizen.

Cancer research will take a long and progressive step forward in the province if present plans for setting up of complete cancer research facilities are successful.

An entirely new feature of the 1948 campaign will be the setting aside of funds toward the establishment of a cancer research laboratory. Discussions are now underway with University of Alberta officials with this end in view.

The elimination of Cancer from the list of diseases that annually kills so many of our citizens is a task of considerable magnitude, although considerable headway has now been made. The Canadian Cancer Society, in the few years of its existence, has contributed much in the way of funds for research, service and financial aid to cancer sufferers, and education of the general public in recognition of symptoms so that cures may be obtained while the disease is still in its early stages.

The support of the public should be given this campaign so that the work of the Society can not only be maintained but extended still further.

Last year 75 persons died in Canada while attempting to light fires with gasoline or kerosene.

NEW MODERATOR OF UNITED CHURCH

—Central Press Canadian
New moderator of the United Church of Canada, Rt. Rev. Willard E. Brewing, of St. George's church, Toronto, is pictured above. He was unanimously chosen over one other candidate at Vancouver, B.C., to succeed Rt. Rev. T. W. Jones of Montreal.

TRUCK ACCIDENT PROVIDES MAN WITH CEMENT SIDEWALK

Vancouver—A.R. D'Alroy has a new concrete sidewalk for his home, and it didn't cost him a cent.

A loaded cement truck climbing a steep grade turned over and over in front of his house. Because the cement would set if left there, company officials said he could have it. D'Alroy had planned a walk, and already had the stringers laid.

With the aid of neighbors he had the walk finished in two hours.

LITTLE ITEMS OF LOCAL INTEREST

Leslie Macneil was a Carbon visitor over the week end.

Mr. and Mrs. Jack Adams were Drumheller visitors on Sunday.

Mr. and Mrs. S.F. Torrance were Calgary visitors this week.

Mr. and Mrs. J. Atkinson were visitors at Black Diamond last week.

Mr. and Mrs. Anderson of Edmonton spent the past week visiting at the home of Mr. and Mrs. L. Poxon.

Whales Succeed In Mass Suicide

Greens Beach, Fla.—Forty-four whales swam out of a rough ocean and deliberately beached themselves recently in an apparent mass suicide.

Many of the mammals, which ranged in size from seven to 14 feet, died quickly as they were rolled over the sands by the rough surf.

A few remained afloat, and efforts were made to drag them back into the water.

Carators said that several times in the past whales have beached themselves along the Florida coast in unexplained "hari-kari" fashion. When they were towed back into the water, they swam headfirst into shore again.

LONG YEARS AGO

October 17, 1929

Mr. and Mrs. H.A. Evans have moved into T.J. King house on the "Island."

The fine weather is still holding out in Alberta and it looks like another late fall.

A new marceller has arrived at the new Carbon Barber shop and Beauty Parlor.

A successful chicken supper was held in the Farmers' Exchange hall on Tuesday night, proceeds of which will go towards the new Anglican Church being erected in Carbon.

The Carbon Lawn Tennis Club brought the 1929 season to a close with the final of the men's doubles competition which was won by W. Poxon and C. Poxon, who defeated G.H. Nash and H. Edwards.

Fire Destroys Two Buildings, Causes Loss of Stock Feed

Jim Bushby suffered a severe loss in the destruction of his barn by fire on Tuesday, October 12. Jim was chopping his winter supply of feed when a spark, apparently caused from a nail in the grinder, ignited the chopped feed. The feed was being stored in the barn and fire soon raged out of control. In the building. The clouds of smoke were seen from town and the local fire equipment was rushed to the scene of the blaze. With the aid of the fire department and the help of many town residents who rushed to the scene the fire was confined to the barn and no other losses were sustained. A stack of oat bundles and other feed nearby were saved.

Another fire on the morning of the same day destroyed a vacant chicken house belonging to Nick Shykin. On Saturday, October 9, grass and weeds close by were being burned and although this fire appeared to be out it apparently smouldered for a couple of days in the manure. At 4:30 Tuesday morning the residents in the house were awakened by the fire which had blazed up in the chicken house but the fire had gained such headway it was impossible to save the building.

DOWN FROM POLE

San Francisco—Milton Van Nolen came down last Thursday from the flagpole where he had sat in a horse saddle for 70 days, 23 hours and 33 minutes.

PLANT 500 TREES ON SCHOOL SCHEDULE

—Central Press Canadian
Tree planting is a name of these Aussie kids of West Ivanhoe, Australia. Five hundred children from Ivanhoe schools, turned out in full to plant 500 pine trees in the Darcum creek valley, near West Ivanhoe, recently. The ceremony of the tree planting was part of a project in which the Heidelberg council proposed to plant trees for the three miles along the valley.

OUR COMPLETE SHORT STORY—

"GOODNIGHT SWEETHEART"

By JOHNNY ROWLEY

CHANCEY FERRIS had always said "Goodnight Sweetheart" to his wife the last thing before going to bed when they were first married. He had continued the practice when he was thirty . . . and when he was forty, and now that he was seventy-three he saw no reason for giving it up.

"Goodnight Sweetheart," he murmured, standing in the dusk of the upstairs room in his daughter's home.

He didn't get into bed immediately but went and stood by the window overlooking the garden. It was but with the heat of late summer after a scorching day and was only now at ten o'clock, beginning to cool off. He stood there, absently, drinking in the warm glow of the moon, scarcely thinking when he caught the murmur of voices from the clump of evergreens around the small summer house.

He didn't mean to eavesdrop but the voices wafted up to him on the cool evening breeze were clear and distinct. He knew at once who was there and frowned.

His granddaughter Dorothy . . . as she was to the family—was almost the image of his wife when they were first married. For that reason he had always thought more of her than his other grandchildren. Only today he had heard that she and Dick Albright were on the verge of breaking up. The news had bothered him for he thought a lot of them both and had been looking forward to the day when they would be married. He had continued to worry about it all day.

His hesitant offer of help had been met with reticence. "It's nothing you can do anything about, Grandpa," Dot had told him. "It'll just have to work out of its own accord."

He had had to be content with that but it had continued to worry him. The voices were now loud and he could only catch a word now and then.

He heard Dick say earnestly: "But Dot, if we're to make this thing work out we've got to trust each other." Dot's reply was lost in the night air but the old man had scarcely listened for it.

His mind had gone back almost fifty years. "Did you hear that, Nancy?" he asked. "He started out to get to trust each other." He chuckled. "Remember that time I had to go to Chicago and was on my way late getting back? That was bad enough . . . but when you found the glove

in my valise, the ones I'd forgotten to give you, you thought I was just for sure. It was a long time before you would trust me completely." He sobered suddenly, coming back to the present. "They're going through the same thing, Nancy," he said.

They were talking again, earnestly, and had got up and stood now just in front of the summer house where the warm glow of the moon glinted softly on the girl's hair. She was slim and tall and her hair, tumbling in loose curls was a raven black. "You know I love you," he heard her say. "I guess I always will . . ."

He didn't hear any more for his eyes had filled and he was thinking of another girl, "She's the spitiest image of you when you were twenty, Nancy," he said. "Do you remember the night I asked you to marry me . . .?" He was lost for a few moments in contemplation. "It was a night like this," he continued finally. He meditated on the scene, the glow of the moon, the girl, though it were yesterday, he murmured.

As he watched the boy stepped forward and attempted to take her in his arms. For a moment she protested, but only for a moment, and with a muttered exclamation pressed her face to his.

Again the scene faded for the old man and he was seeing another scene, a scene which he had never seen. "Remember that night at Halcyon's beach, Nancy?" he whispered. "The night when I looked out at the moon shining on the waves made them look all silver. I took you in my arms . . . He started out to trust each other, eyes unseen, looking back into an almost forgotten past.

Fashions**B.C. Needs More Prospectors**

VANCOUVER.—British Columbia needs prospectors. The minerals are here—they need only to be uncovered, declares Frank E. Woodside, manager of the B.C. and Yukon high school of mining. He is announcing the Chamber's annual night school prospecting course.

Mr. Woodside predicts a tremendous boom in mining activity in coming years. Many have taken the mining course in its past 30 years have made important discoveries, he says.

Subjects studied include mineralogy, geology, prospecting, staking claims, and methods of analysis, testing and development to make a prospect available to mining companies.

VALUE OF FRUIT CROP HIGHER AT PENTICTON

PENTICTON, B.C.—On the basis of grades, value of this year's fruit crop in the Pentiction district is on a par with other years.

The crop is less than estimated in the original survey, due to small size of fruit. However, grade for grade, the overall price is better than last year.

The American market is especially good this year for selected grades.

Horses Sell Highest In Years

AMBROSE LAURIE Dracott shown calling for bids at the horse sale in Moose Jaw, Sask., which each year precedes the feeder show and of feeder stables at the Southern Saskatchewan Co-operative stockyards.

Redwater's Well Big Producer

EDMONTON.—Imperial Oil Redwater No. 1, discovery well 30 miles northeast of Edmonton and 50 miles northeast of Leduc, has demonstrated an open flow potential of over 1,700 bbls. a day, may prove even larger when further acidization is complete.

Initial testing before acidization of the 3,264-ft. well with its 140 ft. of oil-bearing Devonian formation returned only 262 bbls. of oil in a 12-hour period. After acid treatment with 500 gallons of acid, however, the well returned an average of 72 bbls. of oil an hour on a six-hour open flow test. This represented a daily oil production rate of 1,728 bbls. Further treatment by acidization is being carried on with good hopes that open flow potential may prove still higher.

Little gas has accompanied the oil production. Significance of this is now being studied by officials. Apparently there is considerable pressure present for the well to produce the way it has. This could come from either a gas or water drive. A second test well is being completed five miles north of Redwater No. 1. The oil runs about 35 deg. API.

CHICK HATCHING BUSINESS DECLINES

CALGARY.—A sharp decline took place in the chick hatchery business in Western Canada this year, delegates said in reports presented at the 11th annual meeting of the western section, Canadian Federation of Hatcheries Associations.

Speakers blamed the late, wet spring and "greatly increased" feed costs for the decline.

Sharpest drop in output was reported by British Columbia. W. V. Hufford of Milner, said hatcheries in the West coast province had only 60 per cent of a normal year's business.

RECIPES**CHOCOLATE FLUFF**

Add 1 cup confectioner's sugar to 2 stiffly beaten egg whites. Beat until they stand in peaks. Slowly add one ounce sugar unsweetened chocolate, melted, 1 teaspoon vanilla and 1/2 teaspoon salt, and chill well.

BREAD FUDGING

2 cups dry bread crumbs
4 cups melted milk
1/2 cup butter
1/2 teaspoon salt
1/2 cup sugar
1 slightly beaten egg

Soak bread in milk for 5 minutes. Add butter and salt and beat slowly over eggs; add vanilla and mix well.

Pour into greased baking dish. Bake in pan of hot water in moderate oven (350 deg. F.) until firm, about 50 minutes.

Cut in squares with any plain sauce or plain cream. 1 cup raisins may be added if desired. Note: You may use 1 cup sugar and 1 cup syrup.

Western Briefs

WINNIPEG.—Ber parlor in Winnipeg would be permitted to use cigarette-vending machines. Civic health committee refused to change the licensing by-law to permit the operation of the machines in local pubs or anywhere else in the city.

BEAVERIDGE, Man.—Beauregard's Memorial rink and arena is on its way to completion. Speeding construction of this fine project is a committee who have sent forth an appeal for voluntary workers and men who are promoting organizations to stage entertainments in the rink in order to raise funds and speed its completion.

SANDY LAKE, Man.—Believed to be the largest squash ever grown in this district, J. Minchew, who farms three miles east of Sandy Lake, is proudly exhibiting a monster that weighs 60 pounds. It is 33 inches in circumference and 67 inches in longitudinal circumference. Mr. Minchew says the squash received no special treatment, but just seemed to grow at an amazing rate during August and September.

CALGARY.—The historic "44" ranch in the Claresholm-Nation districts of southern Alberta has been sold to an Argentine cattleman, officials of P. Burns Ranches Limited, announced. About 25,000 acres of good land were purchased by Dr. J. M. Cullen of Buenos Aires. No livestock was included in the deal. The sale is believed to be one of the largest ranch land transactions made in Alberta in recent years.

SASKATOON.—Saskatchewan's college of physicians and surgeons went on record as favoring state-aided, contributory health insurance on a "reasonable fee-for-service-reduced" basis.

INVERMERE, B.C.—William Dickson, Invermere, was re-elected president of East Kootenay Farmers Institutes and A. B. Smith of Cranbrook was returned as secretary at the annual meeting held here.

KELOWNA, B.C.—Mayor W. B. Hughes-Garnes said he would recommend to the 1949 city council that traffic lights be installed on Kelowna's main street, in view of the heavy traffic.

How To Get Quick Relief From Sore, Painful Piles

HYDRAULIC RAMS DO THE WORK

HYDRAULIC RAMS are an excellent method of getting water to a good water supply for those who have water in such a location that they can use one.

We are publishing herewith drawings of three ways of installing a hydraulic ram. The important thing in the installation of a ram is to have the drive pipe of the correct length for the installation in question. In the upper drawing of the three installations pictured, the slope between the spring and the ram is sufficiently short that the drive pipe can be connected directly to the water supply. In the second and third pictures it is necessary to install a stand pipe or a supply box between the ram and the spring in order to secure the correct length of drive pipe for the installation in question.

These are definite rules in connection with the length of the drive pipe of a hydraulic ram which must be followed if the installation is to be a success. The drive pipe of a ram must be not less than 10 times the vertical height between the level of the water in the supply and the level at which the drive pipe enters the ram. This height may also be described as the working head or fall of the drive pipe. The minimum head or fall under which a ram will work satisfactorily is about 2½ feet; more than this, however, is better.

These diagrams show three methods of arranging hydraulic rams under different conditions. Where the distance from the source of water to the location of the ram is greater than the required length of the drive pipe, a supply box or stand pipe must be provided.

GERMAN SCHOOL CHILDREN TO STUDY IN BRITAIN

Last week a party of 15 girls and 23 boys left the British zone of Germany for a six-month visit to Britain. These German children, who are all between 16 and 18, will spend the autumn term, Christmas holidays and spring term as the guests and pupils of various State and public schools in Britain. The scheme is sponsored by the Education Branch of the British Council Commission in Germany and is carried out with the co-operation of Britain's Educational Interchange Council. Seventy German secondary school children have already been brought over this year to study in Britain for periods of up to six months.

Defines Six Stages Of Drunkenness

TORONTO.—Alcohol is "a brain poison," not a stimulant, Dr. C. W. Muehlberger, Lansing, Mich., toxicologist, said.

In an address to legal, medical and police experts he outlined six stages of drunkenness: Dry and decent, dejected and dervish, dizzy and delirious, "dazed and dejected," dead drunk and dead.

His speech was a series sponsored by the Accident Prevention Association of Ontario.

He said carbon monoxide poisoning, diabetes and some nervous diseases sometimes produced the same symptoms as drunkenness.

Yellow is the strongest color in point of luminosity.

KITCHEN MEDITATIONS

Hallow'en!

By JANE DALE

Orls in the treetops; cats upon the wall.
Don't you know it's Hallow'en?
Aren't you scared at night?
Witches on their broomsticks, riding through the sky.
Aren't you scared at Hallow'en when ghosts go floating by?
Mother says the witches, ghosts and Jack-o'-lanterns grinning.
When the lights are gone.
Are no mice, not scary, and I love them all.
But I like orls and witches.
And black cats on the wall.
Though they make me scary; make me shriek with fright.
I would hate mice then.
On this Hallow'en night!

GROWS MONSTER RADISH

EDMONTON.—A huge black winter radish, weighing 9½ pounds, turned up in the garden of A. J. J. Bals in Southwest Edmonton recently. The radish was six inches in diameter and 18 inches long.

LITTLE REGGIE

REGINALD—YOU GO RIGHT BACK AND MOP THAT FLOOR!

Prairie Fiesta And A Hayride

(By Grace Lockhart in Vancouver Times)

I WONDER if they'll burn the straw stacks on the prairie? When the weather is all over and the grain has been sold or stored? And if they do, do they make a sort of bonfire of it as we used to do?

Of course with our modern scientific methods of making this out of that, I may be wearing last year's straw stack on my back for all I know. Or in my yolkst, I may not have been born 40 years too soon, but I used to think that burning an awful waste, but what could you do? True, the range cattle used to eat some of it in the winter when the snow was too deep for feeding. Or they could find shelter in the lee of the big stacks, once they had gouged out spaces big enough to hold them.

These cattle would not be confused with the stock that were comfortably fed and housed all winter. Much cow and fancy heifers and teacher's pets generally, or some gray animals that were not so good. But the biggest part of the herd stayed out all winter. They lived on New Year's Eve and the summer fallow, drifting the snow into the ditches, and wiping out the trails, those cattle knew where to find shelter. They got along.

We lived a couple of miles from the new little town, which was beginning to make its mark on the prairie throughout the countryside. Already fences of barbed wire were being strung along on yellow pickets, although we used to cap the pickets with hulked skulls in case we became too civilized. But when the threshing was over, our place was the natural setting for the straw stack party. Dad always picked out the stacks he wanted for the cattle and we could burn the rest.

I used to have a general invitation to my teen age pals in town. I might have been Elsie Maxwell, so closely did I follow the general motif for the party I even collected my guests in the hay rack.

It was better to have the party in the back of the moon because the burning stacks gave a more "lovely light". We used to pretend we were Indiana and pow wow around the blaze, but the stubble hampered our dancing somewhat.

Sometimes we had our party in a harvest moon. Away beyond the bleached fields we could see the faint outlines of the Moose Mountains and the tiny, glimmering lights of the lights in the town. Of course there was always the great canopy of stars. Stars used indeed to make our burning seem puny on such a night. But it was fun anyway.

When the last stack was burned we would go home and have a good feed. Not hot dogs—we had never heard of them. It was more likely to be sandwiches and cake and lots of juice with fresh outsterns on the side. Sometimes we even had a barbeque of apples, if any shipments had come in from Ontario.

When the party was over, we'd drive our guests back to town. The fire would have burned low and the stars came back into their own. Down where the trail dipped down to the coulee, it would be cold with the first hint of frost.

MADE OF CELLS

Like all growing things, wood is made up of cells of different types and sizes, and with different functions. Some cells give strength; others distribute tree foods.

Fire Chief Gives Advice To Cut Down Chimney Fires.

NEW WESTMINSTER, B.C.—Don't cut the draft on your furnace as soon as the fire burns free. Let flames go up the chimney and warm the flues.

This advice to furnace stokers is given by Fire Chief C. J. Higgins, who told members of the Rotary Club the total miles by fire for the year in the province was \$3,300,000.

In a warm fire, he said, there is almost no condensation, and no formation of creosote, the deposit that burns to make "chimney fires," there would be almost no chimney fires, the chief said, if householders would handle drafts as he advises.

He blamed careless smokers for 2,195 of the 5,695 fires in B.C., and for property loss of \$2,523,197.

Weekly Tip
BOILING OVER
To prevent rice, spaghetti, macaroni and vegetables from boiling over, just rub a small piece of butter around the edge of the pan.

WORLD HAPPENINGS BRIEFLY TOLD

King Frederick IX of Denmark has been appointed honorary admiral of the British fleet the Admiralty announced.

Playing his barrel organ for charity, Reginald Stedman of Colchester, England, has raised nearly £11,000 (\$44,000) in 13 years.

According to reliable sources, Noranda, the second largest base metal producer in Canada, has optioned a nickel-copper property which straddles the Sturgeon-Flin Flon highway.

Canada's exports to the United States—vital to the Dominion's dollar-saving program—rose 36 per cent. in the first eight months of 1948, the bureau of statistics announced.

Britain has received no assurance Canada will unfreeze the remaining \$25,000,000 British credit, Chancellor of the Exchequer Sir Stafford Cripps told a press conference in New York.

Canadian defence authorities hailed adoption of the "unified" screw thread, by Canada, Britain and United States as a major step towards general standardization of industrial production.

Eleven men and women from other lands became Canadian citizens at Swift Current court house recently when they were presented with naturalization certificates.

Royal Canadian Electrical and Mechanical Engineers have been formally allied with their British army counterpart, the Royal Electrical and Mechanical Engineers.

An African tribal chief has asked Britain to make Germany give him back his grandfather's sword. The Germans, who had it in a museum, promised to return it under terms of the Versailles Treaty but they refused, said Chief Adam Bapi of Tanganyika's Wabete Tribe.

Christopher Columbus was a weaver, his father's trade, until after he was 21.

ARRIVES HOME AFTER PLANE CRASH RESCUE—Arriving home in Ottawa, Ont., a hero from the U.S. plane wreckage in Saskatchewan, C.P.O. Jack Kastner is greeted by his wife and their six-month-old son, Michael. Kastner was one of five military men who were rescued by the R.C.A.F., after their plane crashed in the wilds of northern Saskatchewan.—S.N.S. photo.

LACK OF SUMMER RAIN DRIES UP FALLS—Lack of summer rain has caused the 274-foot Montmorency Falls in Quebec to dry up. Most of the water from river which feeds falls is diverted for Quebec City power. Bone-dry is face of the falls and only a pool of water remains at its foot. Drying-up has not affected the power supply and there is no shortage of electricity in the area.—S.N.S. photo.

TRAINING FOR EMERGENCY—A former flying officer in the R.C.A.F., Gordon Jarrett of Toronto, recently returned from a two-day transatlantic flight. It was a training flight, Mr. Jarrett said, part of the R.C.A.F.'s current program of organizing a substantial nucleus of trained personnel for flying and training in any emergency. Above is a North Star plane.—S.N.S. photo.

"GHOST" RUNS WILD AT HOME OF ORRIN SPEARMAN—Strange events at the Goulburn, Ont., farm home of Orrin Spearman will not make him admit there are "ghosts," but Mrs. E. Seabrook said she saw one. She stands by fence that the "ghost" jumped over. It is a "fantastic story" say police, but Orrin Spearman stands guard with a gun and his dog, Lassie. The "phantom" is reported to have been eating jam, raw potatoes, tying knots in window curtains, rapping on doors and rocking in the parlor chair in the farmhouse near Stittsville, Ont. The "ghost" is described as being tall, heavy, wearing a cap and striped pants.—S.N.S. photo.

CRASH LIES IN MID-AIR CRASH—Four persons died near Cartierville airport, north of Montreal, when two light planes coming in for landing on the same runway crashed in mid-air. Wrecked aircraft, shown here, was piloted by Robert Carlson, R.C.M.P. constable, who died in hospital. Rene Lanthier, pilot of other plane; Yolande Lemire and Gilles Audette, his passenger, also died.—S.N.S. photo.

THE CAMPAIGNING DEWEYS—Governor Thomas E. Dewey of New York and Mrs. Dewey are shown as they arrived recently at Los Angeles, Calif. The smiling candidate for the presidency and his equally cheerful wife were accorded a roaring ovation by a huge crowd. (S.N.S. photo)

HAS PRINCESS MARGARET A RIVAL?—Georgina Douglas, Eng., are wondering if blonde Sharrman Douglas, (right), daughter of the U.S. ambassador, Lewis Douglas, is "poaching" on the romantic interests of Princess Margaret Rose. The gossip started when Miss Douglas was seen at a movie with the Marquis of Blanford, (left), whose name has been romantically linked with Princess Margaret.—S.N.S. photo.

QUEEN OF FRESHIES—Phyllis Wait, 19, of Port Arthur, Ont., named Freshie Queen at University of Manitoba at the annual student frolic. Phyllis plans a career in textiles.—S.N.S. photo.

CORNWALL HAS ONLY LACROSSE STICK PLANT IN WORLD—Reputed comeback of lacrosse among the small fry across Canada keeps a factory on Cornwall Island busy, only lacrosse stick plant in world. Yvette Seymour, 14, shows Mrs. Anna Peters how sticks are strung. Employees are mostly former lacrosse stars.—S.N.S. photo.

SAILING PARTY RESCUED AFTER TWO DAYS ADRIFT IN LAKE—Guests on week-end cruise of motorboat lost on Lake St. Clair for two and a half days, Mrs. Florence Martin and Josh Meredith of Ridgeway, Ont., examine model of cruiser Siesta. A piece of blanket tied to pole on boat was seen by aircraft aiding in search. Mr. and Mrs. Albert Bigell, owners of motorboat, which developed engine trouble, are shown with pet fox later.—S.N.S. photo.

British Agriculture

IN BRITAIN'S STRUGGLE FOR economic recovery emphasis has been placed on the urgent need for increasing the production of food and manufactured goods, with the object of exporting as much as possible, and decreasing imports. In a report presented a short time ago to the British House of Commons by the Minister of Agriculture, Mr. Williams, some interesting facts were made public regarding recent advances in food production in that country. It was estimated that nearly 500,000 more acres of land were devoted to food production this year than in 1947, and that next year it is hoped that more than 1,000,000 acres will be under cultivation. Of this acreage, it is expected that 2,500,000 will be used for wheat, 1,000,000 for potatoes, 282,000 for sugar beets and 200,000 for linseed.

Standards For Poultry Raised

It is also hoped that during the next year live-stock production will be considerably increased. Poultry production, the report showed, had expanded rapidly, with an increase of 50 per cent. hens more than in the previous year. Official poultry returns issued this summer, showed that there were at that time over 41,578,000 hens which were expected to increase egg production by 670,000,000 during the present year. The British Ministry of Agriculture has recently introduced new methods of increasing egg production by improving breeds and assisting farmers in various ways to maintain high standards of health among their flocks and to obtain maximum egg production throughout the year.

Help To Bring About Recovery

Milk production has also been increased. It is hoped that 900,000 more calves will be produced next year, and that there will be improvement in the quality of the milk. By improving the breed it is estimated that there would be a yearly increase of from 30 to 100 gallons of milk from each cow, and also an increase in the amount of butter fat contained in the milk. All these facts indicate the part which agriculture is playing in Britain's effort to bring about economic recovery. Sir Stafford Cripps, Chancellor of the Exchequer, who visited Canada recently, expressed optimism over the progress which is being made in this effort, and said that the British people have reason to be very hopeful of its success. It is apparent that the British farmers are doing their part in increasing the output of food and other agricultural products to meet the needs of the country during this period.

Blackberries Blamed For Polio Contact

VICTORIA — Blackberries growing on a vacant lot, and eaten by the sufferers, may be the contact for two Oak Bay Elementary school pupils suffering from poliomyelitis, municipal council has been informed.

The lot was burned off immediately and the whole area sprayed with DDT.

In Vancouver, Dr. Stewart Murray, city medical health officer, said such a contact was a possibility, but only a remote one.

The disease might be transmitted by flies he said, but is much more likely to be transmitted direct from a polio carrier.

SNARE RIVER HYDRO PLANT SUPPLYING YELLOWKNIFE

EDMONTON — Power now is being supplied over 50-mile transmission lines of the Snare River hydro plant to Yellowknife supplying 8,000 additional horsepower to Giant Yellowknife and the northern mining town.

The unit which has taken about two years to construct, is the first of several generating plants the government plans to install, eventually for a total output of 25,000 h.p.

The power from the new plants will serve the gold mines in Yellowknife and also residents of the town.

ROLL YOUR OWN BETTER CIGARETTES WITH CIGARETTE TOBACCO

First Of Its Kind In Canada

FUNNY And OTHERWISE

Wife: "Women are not very strong physically."
Hobby: "Pardon me, but you can put the cap on a fruit jar so that it takes a man 20 minutes to take it off."

The village milkman bought a horse for the morning noon. It was not exactly a thoroughbred, but it had four legs.

One day he took his largelin to the blacksmith to have him shoe. The smith regarded the weary-looking animal critically, paying particular attention to his lean body and spindly legs.

"You ought to have a horse some other day," he said at length. "I see you've got the scuffling up."

"There was a crowd at the town hall last night," said the oldest inhabitant of his village.

"Something special on?" asked his better half.

"Oh, yes! It was burned down," was the reply.

A visitor at the Capitol was accompanied by his small son. The little boy watched from the gallery when the House came to order.

"Why did the minister pray for all these men, Pop?"

"He didn't. He looked them over and prayed for the country."

Printer's error: "Judge Bentley, one of our most eligible bachelors, is retiring from politics. He's hearty and 55, the judge says he wants a little peach and quiet."

We like the story about the Scotsman who was a man of few words. He quarreled with his wife one morning, left the house and did not return for 12 years. When he came back, he walked in quite calmly as though nothing unusual had happened.

"And where might you have been, Standy Macpherson?" asked his wife.

"Out!" came the reply.

Wife to husband: "You'd better get up and see why the baby's not crying."

He was one of those fathers who believed in trying to answer any questions put by his son. So he did his best when the young son asked:

"What are ancestors, daddy?"

"Well, my boy," he replied, "You one of your ancestors, and your grandfather is another."

Bird Changed Sex, Reaches Ripe Age

VANCOUVER — Goo-Goo, a bi-sexual bird that wanted to see how the other half lived, now is rated a centenarian.

At the ripe old age of 13, the pet of Mr. and Mrs. William Lamontaine is the equivalent of a human well past the century mark.

About 10 years ago Goo-Goo achieved the mundane female life of egg-laying, at which she was no amateur, and began to show a quacking, gaily-plumaged drake. Mrs. Lamontaine's suspicions of the chicken process were confirmed by a game warden.

The bird had achieved a complete change of sex.

Now slightly lame and too heavy fly, Goo-Goo lives a quiet retired life, but still looks and acts like any well-dressed drake.

VOLUNTEERS BUILDING NEW RINK AT THE P.A.S.

THE P.A.S. Man. — The new community rink being constructed here is expected to be completed and ready for use this winter. The main arches have been erected and working beams of volunteers are putting on the outside sheathing under flood lights.

The women's organizations of the community are serving hot lunches to the volunteer workers.

Fuel Briquettes Made From Straw And Sawdust

WINNIPEG — Fuel briquettes can now be made out of straw and sawdust without the use of a "binder," H. A. Sara, managing secretary of the industrial development board, told a meeting of the Manitoba Electrical association here.

Exhibiting samples of the straw and sawdust briquettes, he said they had the same heat value per pound as lignite coal.

"A machine has been patented," he told the meeting, "that compresses loose straw and sawdust into briquettes with the aid of heat, and the portable machine will be capable of processing 54 to 224 tons of straw every eight hours, depending on the size of briquettes."

Speaking on new and valuable uses of waste products, Mr. Sara told of the growing importance of the oil seed processing industry in Canada.

Canada has 13 oil extraction plants, of which three are in Manitoba, Mr. Sara said, and predicted the rapid expansion of these plants to a position where Canada's annual output of 370,000,000 pounds of vegetable oils will be greatly reduced.

Some butterflies, like flowers, have fragrance. These smell of sweet grass, jasmine, syringa, magnolia, orange blossoms or balsam.

Western Judges Selected For Royal Winter Fair

The following is a list with departments named of Western judges selected to act at the Royal Winter Fair, Toronto, Feb. 10-15, 1948.

Breeding Horses — Belgians and Percherons, Grades and Wagon Horses — George T. Fraser, Tolo, Sask.

Cydedolans, Grades and Wagon Horses — Walter Ross, Olato, Alta. Palomino — J. P. Davis, Winnipeg, Man.

Market Cattle — Live Animals — J. Charles Yule, Calgary, Alta.

Breeding Swine — Yorkshires — Alex. Marshall, Brandon, Man.

Market Swine — Swine Carcasses and Withshire Sides — Lester Hamrick, Winnipeg, Man.

Poultry — Turkeys, Standard — F. Higginson, Millet, Alta.

Seeds — Small Seeds — Dr. W. J. White, Saskatoon, Sask. Wheat, Oats, Barley, Flax, Peas and Shaves — L. Bell, Saskatoon, Sask. C. A. Weir, Calgary, Alta. Potatoes — H. S. MacLeod, Vancouver, B.C.

Canadian Council On Boys' And Girls Work — Beef Cattle — John Connor, Winnipeg, Man. Seed Grain — D. M. MacLean, Winnipeg, Man. Food (Girle Work) — Miss Jean Stewart, Calgary, Alta. Miss Edith Howies, Saskatoon, Sask.

THIS IS ONE WAY TO CATCH THEM

DETROIT — Walter Baker, 34, will spend the next 90 days in jail because of cartheft.

He failed to notice when he took \$45 worth of camera equipment from an automobile that two Bell Telephone linemen were on a pole 30 feet above watching every move.

One of them, Ralph Banner, plugged in his hand telephone and notified his company which called police.
